

Product Information

Silicone Elastomer Powder

Main Advantages:

- Great lubricity
- Fine skin feel
- Cover tiny wrinkles
- Matt effect
- Absorb skin oil, fresh
- Particle uniformity, easy dispersed
- Film-forming, waterproof
- Oil phase thickening

Typical Applications:

Make-up (such as liquid foundation, loose powder, powder eye shadow, lipstick, blush, etc.)

Skin care products (facial cream, body cream, gel, etc.)

Sunscreen products

Suggested Dosage: (for total formula dosage)

Water in Silicone oil formula	3-5%
Silicone oil in Water formula	2-4%
Powder preparation formula	5-90%

Note:

Due to be used for different oil or powder systems and required to offer different effects, the best dosage for a certain product need to be confirmed by a series of experiments.

Usage:

SiCare-2118 can be added into oil phase components (no need to pre-mix with other silicone oil), or when applied for powder preparation, it can be grinded and mixed with other powders directly at the same time.
